

Duke University Medical Center Library

Obstetrics and Gynecology – Web-based Resources

In addition to the resources below, you may use any of the resources available on the [Clinical Tools page](#)

Anatomy

[Anatomy.TV](#) Interactive Pelvic and Perineum
When connected to site, select Resources tab, then An@tomy.tv

[ImagesMD](#)

Select a collection or specialty to view images.

Learning Tools

[OB-GYN 101](#)

Free Website with instructional videos, ultrasound images, common drugs, and common problems. Videos include:

[1st Trimester Ultrasound Scan](#)

[Inserting a Foley Catheter](#)

[Pap Smear](#)

[Pelvic Exam](#)

[Self Breast Exam](#)

The full series of DVDs is available on the workstation available during your OB/GYN clerkship and in the Medical Center Library in the Reserve Collection; please ask for it at the Library Service Desk. Please note: *While these materials are comprehensive and accurate they do not demonstrate the total patient encounter and the patient/physician interactions that are part of any physical exam or procedure. The Bates DVD listed below does demonstrate the appropriate patient-physician interactions.*

[Cytopathology -- what is a pap smear](#)

Bate's Visual Guide to Physical Examination – DVD available in Medical Center Library in the Reserve collection

Female Genitalia, Anus and Rectum WB205 B312 v.9 2005

[Gabbe: Obstetrics - Normal and Problem Pregnancies, 4th ed.](#)

2002 Churchill Livingstone, Inc

[Stenchever: Comprehensive Gynecology, 4th ed.](#)

2001 Mosby, Inc.

Searching the Journal Literature

TIP: Use specific terms for pregnancy, gynecologic diseases and related disorders. **Do not use** the terms for the specialties of Obstetrics and Gynecology – these will take you to articles discussing the profession and not clinical care.

[MEDLINE](#) (Use Ovid or PubMed)

Selected E-journals
